

# NATE Certification Registration Form

## Why NATE Certification

NATE Certification makes good business sense. Certification is about professionalism, pride, knowledge, proficiency and consumer trust because NATE-certified technicians are experts in residential HVAC and light commercial and commercial refrigeration.

## How to become NATE Certified

The participant must pass both a Core and a Specialty exam of his/her choice. The Specialty certification would be in either installation or service path. The Core test covers general knowledge, construction knowledge, and HVACR specific knowledge in the areas of safe/tools/soft skills, heat transfer/comfort, and electrical systems. Specialty tests cover knowledge of the installation, service maintenance, and/or repair of HVAC/R systems. To find out more information on NATE certification, go to [www.natex.org](http://www.natex.org).

## Who should attend

- Anyone in the Trane Dealership, especially technicians
- NATE Certification is required for TVA and TCS Dealers

## Instructor

Bud Martin, Woodson & Bozeman's Field Service Technician

## About the training

Bud Martin, the instructor, will be preparing the participant for the NATE exam on one day and proctoring the exams the following day. W&B University is one of the few organizations in the Midsouth area, approved by NATE to participate in and offer support to the NATE HVACR technician certification program by hosting testing sessions for candidates.

## What you need

Pen, paper, and calculator. Also, we highly recommend each participant takes the Core principle classes on [www.tranelearningresources.com](http://www.tranelearningresources.com). Please call Tina so she can set you up to take these online courses.
